Wildcat **Washington** **Utah**
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Contemplated depth 1,000' or to base of Kaibab formation. Will test all shows. 150' to 400' surface casing 8 3/4" OD cemented to surface. If production is obtained, we will run approximately 1000' of 6 1/2" casing.

Moved about 50' northeast from Four Boys No. 1. Spud - October 15, 1963. Set 107' of 10" conductor pipe. Drilled to 253'. Suspended operations December 15, 1963.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Gentlemen:

Our records indicate that you have not filed a Monthly Report of Operations for the month of May, 1964, for the subject well. Rule C-22(1), General Rules and Regulations and Rules of Practice and Procedure, Utah State Oil and Gas Conservation Commission requires that said reports be filed on or before the sixteenth (16) day of the succeeding month. This report may be filed on Form OGCC-1b (U. S. Geological Survey Form 9-331, "Sundry Notices and Reports on Wells"), or on company forms containing substantially the same information. We are enclosing forms for your convenience.

Your immediate attention is required in this matter.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

Certified Mail
RETURN RECEIPT REQUESTED

December 7, 1965

Mr. Glade Stubbs
Four Boys Company
328 Xavier
Las Vegas, Nevada

Dear Mr. Stubbs:

According to our records you, along with Messers Maynard, Buck, and Cripps, were lessees of record of Federal lease Utah 051426, now terminated, and drilled well 1-X NW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 24, T. 43 S., R. 15 W., on this lease. Also, the four of you are principals on the \$10,000 lessee's bond submitted to cover operations on this lease and the subject well. By certified letter dated June 17, 1965, we requested you to properly plug and abandon well 1-X. Rather than plug and abandon the well you discussed the possibility of converting the well to a water well with us numerous times and we also discussed this possibility with a Mr. Ralph Klein. To date we have had no indication that the well has been plugged and abandoned or converted to a water well.

We have approved a plugging program for this well and after reviewing this procedure we do not believe that proceeding with the approved plugging program would interfere with converting the well to a water well at any future date.

Accordingly, you should take steps to convert the well to a water well or properly plug and abandon the well. Following is the plugging program that we have already approved for the well:

- (1) 20 sack cement plug at 403' (1/2 in and 1/2 out of surface pipe)
- (2) 5 sack cement plug at surface with identification marker
- (3) clean, level, and restore the location to its original condition. This includes removal of all equipment, i.e., burned rig, trash, etc. and backfilling of all pits.

To convert this to a water well steps (1) and (3) would be exactly the same and step (2) would be changed to including a control valve of some type on the casing rather than a surface plug and marker. In addition, it will be necessary for the owner of the surface rights of the subject acreage to assume liability for this well and to relieve you and the United States from any future liability.

You should comply with the above requirements within 30 days of receipt of this letter or we will refer this matter to the surety company of your lease bond for compliance with the lease terms and the Oil and Gas Operating Regulations.

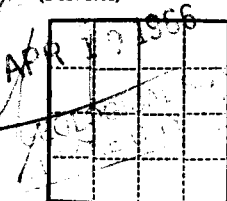

Sincerely yours,

Rodney A. Smith,
District Engineer
